Course Descriptions

Auditor Training

The Auditor Training course provides participants with an introduction to health and safety program auditing. The course teaches permanent employees how to evaluate the performance of their company's health and safety program.

Focusing on the principles behind day to day safety management, injury management and COR safety program auditing, participants of the Auditor Training course will obtain skills and knowledge appropriate to the development and maintenance of a business's safety program.

Foundation

This course introduces the basic concepts of health and safety – the things you will need to know so that your company can set up an excellent health and safety program and get the most from participation in the Certificate of Recognition program. It is designed for people who are responsible for health and safety in their organizations.

Train the Safety Trainer

This course will assist you to plan and deliver safety training. You will develop basic skills to: conduct training sessions, select appropriate learning activities, use effective visual materials, deliver instruction in a supportive environment, and through the process of observation and feedback, you will gain insights in how to improve your own instruction.

Ideas and strategies are presented that will provide you with a basis for making sound decisions in your training settings. The emphasis in this course is on the development of practical skills that you can take back and use in the classroom or in your work setting.

Early and Safe Return to Work

During this course we will introduce leading edge practice in the RTW field, and provide ideas and practical tools that you can take back to your workplace and use right away.

By the end of the session, you will be able to: recognize the benefits of early and safe return to work, identify the elements of successful return to work programs, identify the steps in developing an effective early and safe RTW program, develop a plan for a RTW program at your workplace, access tools and support services from the Construction Safety Network.

Owners and Managers Orientation

This course is not an introduction. It is about moving from acceptable safety to outstanding safety, quality and productivity. It is designed for leaders. Change doesn't happen without the support of those of you who are at the top of an organization.

By the end of the session, you will be able to: improve the safety culture of your organization, recognize the importance of your leadership, and understand the purpose and elements of the COR program.
